

That the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I value the peace and quiet I have at home, and that peace and quiet is only possible because of our privacy law. I used to get dozens of calls per week, but now I know that if I pick up the phone, it's someone I want to talk to. If you insist on this version of the proposal, do not let it preempt Indiana's current law. And if you are truly interested in protecting our privacy, why not adopt the same high standards Indiana has proven to be effective? Thank you for your time.
